

## Pm Trac *Generation 38*Technical details at a glance:

	Perfect feeling of space in the XXL cabin thanks to
l 1	the largely dimensioned air conditioning with au-
	tomatic control.

A well thought-out system of **protected hoses** on the complete crane ensures minimum downtime.

Comfortable, air-suspended cab for two persons with air-suspended driver's seat and large passenger seat.

The Power Link System (toggle joint connection) guarantees maneuverable crane operation, greater reach, and more lifting power.

7 m² glass surface and a **340° electrically rotating operator's platform** for an optimal view of the working environment.

Additional **crane floodlights** turn night into day and always light up the gripper area.

Plenty of storage space for chainsaw, fuel canister, and tools for forestry.

The **telescopic cylinder** is internally mounted, protecting it from damage.

High-torque and economical 6-cylinder engine with 205, 253, or 292 hp.

Equipped as standard with a powerful flange rotator and on request also with a double pendulum brake

6 CLEANFIX reversing fan for radiator cleaning with optimum cooling and considerable fuel savings.

PSA (Pfanzelt system mount) for the attachment of a cable winch, forwarding or loading crane as well as mowing booms.

7 Front hydraulics with optional front PTO.

Professional and powerful **Double drum gear** winch with two times 6 or 8 t pulling force.

Quick and easy **removable fenders** and lighting equipment for road travel.

Freely accessible rear power take-off shaft, trailer rail, rear hydraulics even with mounted crane (without pole shield).

The thrust tube front axle with automatic blocking for crane work enables perfect standing.

EU Tier V: Exhaust aftertreatment with SCR technology, AdBlue injection, and a particle filter.

10 12 work lights on the cab roof provide optimum illumination of the working environment.

Safe working via an active standstill control is provided by the continuously variable, power split transmission.
